

ACKNOWLEDGMENTS

The authors wish to thank the staff of the N.C. Natural Heritage Program for guidance and input during the planning stages of this study, as well as during the actual work stages. Alan Weakley and Charles Roe provided much of this input; Roe and Mike Schafale assisted in some field work.

Others who assisted the authors with field work were Vonda Frantz, Michael Lane, and Merrill Lynch. Lynch's previous field work and detailed reports for parts of the Albemarle-Pamlico Estuarine Study area, such as the Roanoke River floodplain and Washington County, were most helpful.

County foresters (with the N.C. Forest Service) provided much input on sites for potential survey work. Particularly helpful were Herb Crase, Leon Hughes, Larry Lawrence, Roger Spivey, and Cullen Swain.

The authors also acknowledge the many landowners who gave permission to have survey work conducted on their property. These landowners were also helpful in providing information about the history of the property, as well as providing comments about potential and real threats to the property. Without such permission, this report would have been difficult to compile and would have been very incomplete.
